His Excellency Minister of Finance

Subsequent to my letter number 12/11/4/4210 dated 5/3/2008 and with reference to your letter number 12/1/27/7086 dated 8/4/2008.

The Cabinet reviewed your honorable aforementioned letter and esteemed letter of Chairman of National Energy Research Center number 117/12/249 dated 24/3/2008 related to Decision no. (898) dated 4/3/2008 including exempting the sets and equipments of rationalizing energy consumption and renewable energy from taxes and fees as outlined therein. Upon your honorable recommendation, the council decided in session thereof held on 15/4/2008 accepting the amendment of the aforementioned decision thereof where all stated lists therein are repealed, replaced by the statements attached to your honorable letter, and approved for exemption as follows:

1. Exempting sets and equipments, whose details are outlined in statement (A) attached to your honorable aforementioned letter, from custom duties (for non exempted items) and letting General Sales tax (zero percentage) imposed thereon.
2. Exempting sets and equipments, whose details are outlined in statement (B) attached to your honorable aforementioned letter, from custom duties (for non exempted articles) and letting General Sales tax imposed thereon as such items are of general usage not like such for rationalizing energy and renewable energy.

Kind regards

Prime Minister

Statement (A)

sets and equipments exempted from custom duties (for non exempted items) and letting General Sales tax (zero percentage) imposed thereon.

Identification Article	Item Name
3206.19	– Selective paint of chrome basis
3206.49	– Selective paint of copper and/or nickel
7007.191	– Tempered glass imported by factories as production inputs
72.08 72.09 72.10 72.11	– Sheet iron
7411.219 7411.221 7411.291	– Pipes and tubes of copper alloy imported by factories as production inputs
8481.804	– All kinds of valves; Thermostatic valve, three way valve, four way valve, solenoid valve; imported by factories as production inputs
8412.80	– Systems of generating energy by wind energy (full system)
8413.81	– Centrifugal Pumps
9032.903	– Heat sensitive sensors prepared for industrial use and imported by factories as production inputs
8481.301	– Shut-off valves (non return) and imported by factories as production inputs
8541.40	– All kinds of solar panels
8541.40	– Solar cell sheets
3917.311	– Tubes, pipes and hoses that endure the pressure degree of at least 27.6 MPa
7304.313 7304.393 7304.413 7304.493 7304.513 7304.593	– Iron tubes
7307.211 7207.221 7307.231 7307.992	– Requirements as tying connection and T elbows – Connecting seamers (flanges) – Elbows, bent joints and threaded sleeves – Requirements of connecting edges by welding – T connections
8412.901	– Parts of systems of generating energy by wind energy such as: blades, generator and gearbox
7308.201	– Tower
9015.801	– Tools for measuring speed and direction of winds
9032.81	– Hydraulic control tools of system
9032.893	– Electronic control tools of system

9032.10	– Controller of difference in temperature degrees
8419.193	– Insulated water tank with heat exchanger
8419.192	– Integrated solar system
8504.403	– Electro static converters of 10 kg or less weight
8507.201	– Lead savings (batteries)
8415.101	– Air conditions working by solar energy
8418.102 8418.211 8418.302 8418.402	– Fridges working by solar energy
9032.209	– Control systems for cooling and heating
6806.104 6806.901	– Insulator (rock wool)
3921.11	– Insulating building materials (polyester)
3921.13	– Insulating building materials (polyurethane)
7019	– Insulating building materials (glass fiber)
3919.105 3919.903	– Slices reflecting sun rays (curls shape)
8532.10	– Tools for improving power factors
8539.311	– Energy saving lamps
8539.31	– Florescent pipes
8533.40	– Lightening control systems
8541.30	– Control systems of high lightening – Dimmer
8539.321	– Sodium lamps
9405.101 9405.402	– Lightening units composed of electronic valves that send light
8481.801	– Energy saving air vallats
8414.599	– Air leak detectors
8703.9051	– Hybrid cars

Statement (B)

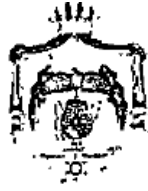

Exempting sets and equipments from custom duties (for non exempted articles) and letting General Sales tax imposed thereon as such items are of general usage not like such for rationalizing energy and renewable energy.

Identification Article	Item Name
8419.899	– Absorption coolers and cooling towers
8414.804	– Compressors containing heat retrieval units
9032.81	– Apparatus controlling compressed air
6902.902	– Insulating materials containing aluminum
8404.101	– Economizers and air pre-heaters
9032.899	– Fire controlling systems
8419.50	– Heat Exchangers
8501.522	– High efficiency multifaceted engines whose power is at least 750 watt and at most 75 kilo watt
8501.402	– AC motors with one face to rationalize using high efficiency energy
8511.301	– Electric motors' operation starter
8536.301	– Harmonics Damper
8504.109	– ballast resistor
8416.101	– High efficiency burners
8416.101	– Heat recovery boilers

His Excellency Minister of Environment

Subsequent to my letter number 12/11/4/4210 and 7127 dated 16 and 29 /4/2008 and with reference to your letter number 9/6/3592 dated 15/6/2008

Upon your honorable recommendation, I agree to form technical committee that includes the following:

- Ministry of Environment
- Ministry of Finance
- Ministry of Energy and Mineral resources
- National Energy Research Center

To discuss all outstanding issues that face executing and implementing all items of Cabinet decisions no (898) and (1281) dated 4/3/2008 and 15/3/2008 concerning exempting sets and equipments for rationalizing energy and renewable energy from taxes and custom duties.

Kind regards

Prime Minister
